Product Description

CADR 88 CFM Humidifier Air Purifier 2 In 1 Machine For Home Hotel

The air purification aspect of this appliance is powered by a state-of-the-art HEPA filter, which is a three-in-one design capable of capturing 99.97% of particles as small as 0.3 microns. This includes dust, pollen, smoke, pet dander, and other allergens, ensuring that the air circulating in your space is clean and breathable.

To further enhance its air purification capabilities, the appliance is equipped with a UV-C sterilization lamp. This UV light technology works by emitting ultraviolet rays that are harmful to microorganisms, effectively neutralizing bacteria, viruses, and mold spores, providing an additional layer of protection against harmful pathogens.

The appliance's smart features include an intuitive user interface, which may consist of touch controls, a digital display, and a remote control, allowing for easy operation and monitoring. It also includes safety mechanisms such as an automatic shut-off when the water tank is empty or in the event of overheating, ensuring safe and worry-free usage.
