Product Description

Auto Humidistat To Maintain Comfortable Humidity Desktop Home Ultrasonic Humidifier

Using a humidifier correctly would dramatically improve your general health and comfort, reducing dry skin and respiratory problems by humidifying your air. Indoor humidity can be too low or too high. Low humidity can lead to dry skin, wrinkles, and a higher chance of catching a cold. If it's too high it can cause mildew. The most comfortable environmental humidity range is between 45% to 55% room humidity.
